

Oh no snow and beauty

By: Elise

Once upon a time there lived two sisters, one named Maleficent and the other Grimhilde. Maleficent was the oldest. The two were seperated at birth, so Grimhilde didn't have a sister to look up to. Now maleficent had different feelings about this, but lets just talk about Grimhilde for now.

Grimhilde had always been self-conscious about her name. Ever since she started school, she had been bullied, teased, and sometimes she

would even have a hard time with her teachers. She was very beautiful and that was the only thing she had to feel “normal”. So she worried about that. Anytime she thought she was “ugly”, she would buy makeup, lipstick, foundation, mascara, and eyeshadow.

She hated Anyone prettier than her because everyone would go back to teasing her about her name. That stuck with her. Then, people teased her about her name and being

single. They didn't care how mean they were.

When she was older, she was the fairest of them all, but she was still single. Then one day, she heard a king was looking for a maiden. Of course she went to meet him and he instantly fell in love with her. They got together and he couldn't thank her enough.

“What ever shall i do to return this favor?” said the king. “Make me a magic mirror.” said grimhilde. The king was willing to do anything for her majesty. “My brother has three fairy godmothers who can get you that

quickly.” So she got the mirror and finally, snow was born. She didn’t know she was going to be beautiful yet for the child was still a baby. The king took her to see his brother who was going to have a child soon. Right then and there, the fairies knew something was up. When cooking dinner ,the fairies whispered about her calling her the evil queen. She had dinner and went back to the castle. Unfortunately, the king died shortly after and grimhilde was forced to raise Snow. Soon word got out that baby aurora, the king’s brother’s daughter, was born.

Year after year, grimhilde asked her mirror “am i prettier than everyone else?” and year after year, it answered “Yes my dear. it is very clear no one else is near as fair as you are.”

Although grimhilde was nice to snow, snow did the same thing people in her school did to her. The child mentally *abused* her, convincing her to legally change her name to something basic. She decided on amanda. Amanda loved snow, but snow did not love her. After years of love and affection to snow, she finally snapped! She banished snow from the castle forcing

her to live in the barn. Aurora
becoming snow's best friend, tried to
brutally slay
Amanda. She was caught by the guard
and sent home.

Amanda went to confront aurora and
saw Her sister maleficent, it was her!
She was there. Amanda told her all
about what happened and what aurora
did. Maleficent told amanda how the
fairies turned on her and how she had
been *harnessing* the power of black
magic. While over there, Snow plotted
her escape and broke into someone
else's house. To punish Snow,

Maleficent taught amanda how to *shape shift*. To punish her, Amanda shape shifted into an ugly old woman and a beautiful young woman. They both had apples, the old woman had one with the power to keep you *youthful*, the young had the power to make you ugly.

She tested her and snow became ugly. The only way to break the spell was to realize what's right, once she did, she would be free from the curse.

The fairies did all kinds of things to make aurora hate maleficent. They pricked her finger on a spinning wheel

and put her to sleep, only to wake up by true love's kiss, and blamed it on maleficent. They also acted like maleficent made her mother die, but she really died of *cancer*.

This one she couldn't do alone, so she plotted with her sister. They took a long time to figure it out but by that time, they didn't even notice they had readapted to water and a new king, Trident, was on the throne. Now trident was an amazing king. He didn't have a wife. This was caused by uncertain death, but he didn't need a new one. He hated fairies because they

were one of the suspects of her majesty's death. They were banned and aurora was punished with tiredness. Now the sisters had to find out where their parents were.

Amanda told her backstory and then maleficent told hers...

Like i said, Maleficent had different feelings about her childhood. She was put in an orphanage after they found her kidnapper that sold her to a family with riches. You would think she would have an amazing life, but they put her to work as soon as she was four. They kicked her and yelled at her

and they locked her in a dungeon when she was done with chores. At 12, she ran away and a king, at the age of 20, saw her and took her in. No one was mean to her. After all, they were having two sons who would soon rule a kingdom of their own. One got the father's, the other got the mother's. Then one day, they hired fairies who were the same age as maleficent. They were friends until the king favored maleficent, then they hated her.

They plotted a way for the king to turn against her

ariel. And amanda changed her name
back to grimhilde.

The end!!
