

# Goldilocks and the Three Cavemen

[An adaptation of Goldilocks and the Three Bears]

By Elliott A.

Once upon a time there lived a young, beautiful girl named Goldilocks. Ohh, how she loved the sea. She always wanted to explore it. So one day she got her scuba gear and walked down to the beach. She hopped into the warm, bathtub-like water and whispered “ahh”. Then she put on her mask and slowly walked into deeper water. Once she was fully underwater she looked at the beautiful ecosystem around her. There were giant schools of fish and small sharks. There were also massive blocks of coral filled with tiny fish and shrimp. All this amazing stuff put a smile on Goldilocks’ face. As soon as the amazement of the fish and coral had passed, Goldilocks started swimming again. She kept on swimming but came to a stop when she saw a massive barracuda swimming right in front of her. She screamed as loud as she could underwater. But she then stopped when the terrifying barracuda had passed. After that iconic moment, Goldilocks headed up to the surface to see how far she had gone. She estimated the shore was 60 yards away so she said, “I will swim 200 yards away and make it back safely”. And just like that, Goldilocks kept on swimming. She swam for another hour or so not knowing how long she had been swimming because of all the ocean

wonders. Right then she saw another coral reef and thought that it was strange for there to be a coral reef in the open ocean. She then realized that there was actually an island behind the coral reef and out of her curiosity she had to explore it so she zoomed past the coral reef and swam up to the island. She jumped out of the water with excitement and ran up the beach. Once she got off the beach she started looking around at the cool birds and trees. Because she was so interested in these amazing things, she missed seeing the three cavemen that ran past her. Although she did not see the cavemen she saw their footprints and started following them. She kept on walking until finally, she found where they were coming from. It was a large cave right in the center of the island, and of course, out of curiosity she had to go inside and check it out. When she walked in she saw a carved tree trunk with three stone plates inside and each plate had a fish on it. Goldilocks tried the first plate, "TOO HOT" she screamed. Goldilocks tried the next plate, "TOO COLD" she shrieked. Goldilocks tried the last plate, "just right" she whispered. After all the food Goldilocks wanted to sit down so she walked further into the cave and saw three wooden chairs. She tried sitting on the first one, "TOO HARD" she yelled. Goldilocks tried the next one, "TOO SOFT" she muttered. Goldilocks tried the last one, "just right" she whispered. After sitting for a while thinking about her trip, the chair broke. Goldilocks then decided she was very tired so she

went even further into the cave and saw three wooden base, grass beds. She smiled and hopped into the first one, "TOO ITCHY" she shrieked. Goldilocks jumped into the next bed, "EWW, FLEAS" she screamed. Goldilocks was really tired now so she hopped into the last bed and said, "just right". She fell asleep in 10 seconds.

Meanwhile, the cavemen all came home. Daddy caveman said, "Someone took a bite of my fish". Mommy caveman said, "Someone took a bite of my fish too". Baby caveman said, "And someone ate all my fish". They moved into the living room. Daddy caveman said, "Someone has been in my chair". Mommy caveman said, "Someone has been in my chair too". Baby caveman said, "Someone has broken my chair". Mommy and daddy cavemen felt bad for their baby. They walked into the bedroom. Daddy caveman said, "Someone has slept in my bed". Mommy caveman said, "Someone has slept in my bed too". Baby bear said, "Someone is still sleeping in my bed". They all looked at Goldilocks and growled. Goldilocks woke up immediately and screamed at the sight of the cavemen. She got out of bed, then ran out of the cave and swam all the way back to her beach. Then she ran into her house, closed the door and said, "I am lucky to be alive". THE END.
