

Kristy and Mary Anne from The Babysitters Club

By: Maya M.

I decided to compare Kristy and Mary Anne from The Babysitters Club book 1. They are similar and different in many ways. The similar things about their appearances are that they both have brown hair and they are both girls. Things that are different about their appearances are that Kristy chooses to wear casual clothes and Mary Anne wears what her dad tells her to wear. Also, Mary Anne always wears her braids in her hair. Kristy never wears braids.

Mary Anne and Kristy both have things in common about their personalities.

They are both trustworthy because people in their town hire them to babysit their children. They are also helpful to parents when they babysit. Even though they are similar in many ways they have their differences. One way they are different is that Mary Anne is shy. She doesn't talk too much around people she doesn't know. But Kristy, on the other hand, is very talkative. She talks a lot. Also, Kristy is a very good businesswoman. She started the babysitter's club which is a business where she and her friends get paid to babysit. Her business is very successful.

Mary Anne and Kristy both have similar actions and motives. They both babysit for kids. Their motives are that they like kids and want to earn money. Also, they are both having a hard time in their families.

Mary Anne's mom died when Mary Anne was three years old and Kristy's mom has a boyfriend. Some differences in their actions are that Kristy says things she doesn't mean to say because she doesn't like her mom's boyfriend. Mary Anne doesn't talk a lot because her mom died.

Mary Anne's family and Kristy's family are similar in a few ways. Mary Anne and Kristy both have one parent in their house. Mary Anne lives with her dad, but Kristy lives with her mom. Both of their parents can be strict. Mary Anne's dad is strict because he wants to keep Mary Anne safe. Kristy's mom is strict when Kristy is not nice to her mom's boyfriend. One difference between their families is that Mary Anne doesn't have any siblings. Kristy has three brothers and will have a stepsister and

stepbrother soon. Also, Mary Anne lives with her dad and Kristy never sees her dad.

In conclusion, Mary Anne and Kristy are both similar and different from each other in many ways. This makes the book more interesting to me because if the characters were the same, the book would be boring.
