

Harry Potter and Ron Weasley from Harry Potter

By Sam L.

Hello everyone! This is a comparison writing on two characters from Harry Potter, Harry and Ron. I will be comparing their appearance, personality, actions and motives, and family. I hope you enjoy my comparison writing.

First I will be comparing Harry and Ron's appearance. They both have short hair but Ron has red hair and Harry has black hair. They both wear wizarding robes and at Hogwarts they both wear Gryffindor wizarding robes. They both have many scars but Harry has a lightning shaped scar on his forehead. Lastly they both have blueish-green eyes.

Next I will be comparing Harry and Ron's personality. They are both loyal friends who would do anything for each other. But they also can both be moody teenagers that annoy each other. In general they are both just nice, thoughtful people. Harry tends to be more stressed and anxious about Voldemort than Ron.

Now I will be comparing Harry and Ron's actions and motives. They both help find horcruxes to try and defeat Voldemort but Harry is more of the leader and makes most of the decisions and Ron just follows

along(he still helps a lot). Also they both play quiddich because they love the sport but they play different positions. Harry plays seeker and Ron plays keeper. Lastly in the first book the both look in the mirror of Erised which shows you what you really want but they saw different things when they looked in the mirror. Harry saw himself with his parents but Ron saw himself holding the Quiddich World Cup trophy.

Lastly I will be comparing Ron and Harry's families. First of Harry has no siblings unlike Ron who has four older brothers (Bill, Charlie, Percy, Fred, and George) and one younger sister (Ginny). Also Harry does not have parents because Voldemort killed them when he was only one years old. Ron has a mother and a father.
